# Lauren Pesce

Washington, DC | pesceelauren@gmail.com | lpesce57.github.io/Lauren-Pesce-Portfolio | linkedin.com/in/laurenpesce

## PROFESSIONAL PROFILE

UX/Product Designer with front-end development skills (HTML, CSS, JavaScript, React, Tailwind) and a research-driven, accessibility-first approach. Co-founded a consumer social platform, taking products from user research and Figma through production code. Experienced in design systems, WCAG 2.2 audits, and responsive Shopify builds.

## PROFESSIONAL EXPERIENCE

### UX Designer & Front-End Developer

*LakeMapper* | *Remote* | *April 2026 – Present*

- Design and build responsive, accessible Shopify pages in Liquid, HTML, JavaScript, and CSS for a subscription SaaS platform, turning business requirements into clear, easy-to-navigate experiences.
- Built all the site's industry landing pages and merged the Help Center and blog into one content hub organized around customer questions; the site has reached 1,200+ sessions since launch.
- Design branded web and print marketing assets, including postcards and business cards, for client delivery.

### Co-Founder & Chief Product Officer

*Synth (live-music social platform)* | *Washington, DC* | *October 2025 – Present*

- Audited the app against WCAG and identified 30+ accessibility issues; built an accessible color system and a Figma design system with 50+ reusable components plus typography, spacing, and color tokens.
- Own product design and front-end development on a three-person founding team, taking interfaces from Figma to production in HTML, CSS, and JavaScript.
- Own social strategy and short-form video for the app's primary discovery channel, creating content that introduces live-music audiences to Synth and drives the majority of new sign-ups.

### Freelance UX & Web Designer

*Freelance/Contract* | *Remote* | *October 2025 – Present*

- Conducted a UX audit and designed a five-page, responsive website redesign concept for a lakeside lodging business, reworking navigation, content hierarchy, and accessibility.
- Design branded digital content and motion assets for The Gap-Strap, adapting visuals and messaging for web and social channels.

### User Experience Design Intern

*Digital Summer Clinic* | *Ann Arbor, MI* | *June 2024 – August 2024*

- Conducted stakeholder interviews and analyzed historical company data to define usability needs and prioritize website design work.
- Redesigned key pages (approximately 25% of the site), in Figma, refining wireframes and interaction designs with marketing and company stakeholders.

## SELECTED PROJECT

### Maize and Blue Cupboard Website Redesign

*University of Michigan* | *Ann Arbor, MI* | *August 2024 – April 2025*

- Ran user interviews, usability testing, and accessibility audits for a campus food pantry website; redesign cut task completion time by 58%.
- Built and tested a high-fidelity Figma prototype that reduced user errors by 71%; delivered wireframes and information architecture for implementation.
