PROFESSIONAL PROFILE

Multidisciplinary design and engineering professional with a background in UX design, software development, and client collaboration. Skilled in bridging creativity and technical execution by building intuitive digital experiences, analyzing complex problems, and delivering solutions that drive impact.

SKILLS

- **Programming & Frameworks:** Python, C++, JavaScript, Node.js, React, HTML, CSS, SQL, Django, REST API
- **Data Visualization:** Matplotlib, JSON, R
- **Design Tools:** Figma, Canva, Adobe Photoshop, Lightroom
- **Dev Tools:** GitHub, Git Version Control, Xcode, Visual Studio, Google Analytics
- **Package Management:** NPM, Yarn
- **Other:** API integration, DOM manipulation, Accessibility, LocalStorage, UX Research (Interviews, Usability Testing, A/B Testing, Heuristic Evaluations, Accessibility Audits, Affinity Mapping)

EXPERIENCE

User Experience Design Intern

Digital Summer Clinic

June 2024 - August 2024, Ann Arbor, MI

- Executed thorough user research by interviewing key Ready Signal stakeholders and analyzing historical company data to identify and address core needs.
- Prototyped and refined multiple Figma wireframes, leading the redesign of 20% of their website, improving usability and user experience.

Summer Camp Counselor

University of Michigan

June 2021 – August 2023, June – July 2025, Lesterville, MO

- Oversaw care 24/7 for 10–12 children ages 6–16, ensuring safety, emotional support, and positive experiences while leading approximately 30-50 activities and off-site trips a week.
- Assisted leadership in coordinating schedules as well as resolving camper conflicts, fostering a safe, inclusive environment recognized for strong leadership and problem-solving.

Server

Ashley's

August 2024 - May 2025, Ann Arbor, MI

- Provided friendly, prompt service to create memorable moments for anywhere from 10 to 65 guests at a time.
- Supported a fast-paced team by maintaining clean, organized kitchen stations, reducing delays during peak hours.

Human Powered Submarine Team Member

University of Michigan

August 2023 - May 2025, Ann Arbor, MI

- Collaborated with a team to assure the safety and effectiveness of the submarine, following 100% of safety regulations.
- Utilized C++ to program components in a submarine to support the interior, measure the power needed and aid in the controls and their ability to withstand water.

NOTABLE PROJECTS

Maize and Blue Cupboard Website Redesign

University of Michigan • August 2024 - April 2025

- Conducted user research over the course of a year and identified core website issues through interviews, user testing, and accessibility audits, lowering task completion time by 58%.
- Created and tested a high-fidelity Figma mockup, incorporating UX design best practices and feedback from stakeholders to guide redesign recommendations, decreasing incorrect actions by 71% and delivering updated wireframes and information architecture to stakeholders for implementation.

Movie and Weather API Data Analysis

University of Michigan • November 2023 - December 2023

- Developed a data analysis solution in Python that queried 4 APIs to collect 400 points of movie data and 100 weather records, then integrated the results using SQL and JSON.
- Analyzed and identified statistically significant correlations between movie popularity and Ann Arbor weather on release dates using Matplotlib.
- Collaborated in an Agile team environment, leveraging version control to manage real-time contributions, code reviews, and iterative development.

Responsive Harry Potter Game Website

University of Michigan • April 2025 - May 2025

- Designed and built a fully responsive website featuring interactive Harry Potter-themed games using HTML, CSS, and JavaScript.
- Integrated multiple public APIs and prioritized accessibility and UI polish to create an engaging user experience while assuring 100% WCAG accessibility compliance.

Piazza Machine Learning Post Classifier

University of Michigan • November 2023 - December 2023

- Developed a machine learning classifier in C++ to categorize Piazza posts using word frequency and labeled training data.
- Implemented data preprocessing techniques including tokenization and case normalization to prepare raw input for classification.

EDUCATION

University of Michigan School of Information

Bachelor of Science in Information (BSI), User Experience (UX) Design

Minor in English • Ann Arbor, MI • May 2025 •

- **Cumulative GPA:** 3.76 / 4.00

- **Coursework:** Introduction to UX, Information Ethics, Data Oriented Programming, Web Design, Development and Accessibility, Programs and Data Structures, Introduction to Statistics, Needs Assessment and Usability, Building Data-Driven Web Applications, Building Interactive Applications, Interaction Design Studio, UX Driven Entrepreneurship

- **Dean's List,** Multiple Semesters

- **Queen Mary University of London** Studies Abroad, January 2024 - May 2024
